

Marcus D. Gingerich

Contact: Ph #: (607) 255-5323
 Cornell University
 409 Phillips Hall
 Ithaca, NY14853 mdg37@cornell.edu

Education

- Ph.D.** in Electrical Engineering, May 2002, University of Michigan, Ann Arbor, MI. "*Multi-Dimensional Microelectrode Arrays with On-Chip CMOS Circuitry for Neural Stimulation and Recording*"
- M.S.** in Electrical Engineering, Major: Solid State, Minor: Circuits and Electronics, December 1996, University of Michigan, Ann Arbor, MI.
- M.S.** in Bioengineering, Concentration: Bioelectrical, April 1994, University of Michigan, Ann Arbor, MI.
- B.S.** in Electrical Engineering, *Summa Cum Laude*, Options: Automatic Control, Electronics, Bioelectrical, February 1992, Michigan Technological University, Houghton, MI.

Research Interests

- Bio-MEMS, (MicroElectroMechanical Systems) application of solid state electronic fabrication technologies to interfacing with the human sensory and motor systems, particularly the central nervous system
- Neuroprosthetics
- Microelectrode arrays for stimulation of excitable tissue and recording of neural signals
- Solid state micro-fabrication technologies
- Design of microelectronics for implantable devices and systems
- Micropackaging and/or protection of implantable devices and systems

Current Position

- Research Health Scientist:** June 2003 to present, *Center for Innovative Visual Rehabilitation, VA Boston Healthcare System*, utilizing the Cornell Nanoscale Facility at Cornell University, Ithaca, NY.
- Develop microfabrication technologies for a chips-first high density interconnect technology for application in a retinal prosthesis under a VA Career Development Award grant.
 - Develop microfabrication technologies for implantable, flexible, polymer-based microelectrode arrays and flexible substrates to build an *ab-externo* retinal prosthesis.

Previous Experience

- Research Health Scientist:** June 2002 to 2003, *Center for Innovative Visual Rehabilitation, VA Boston Healthcare System*, utilizing the Solid State Electronics Laboratory in the Department of Electrical Engineering and Computer Science at the University of Michigan, Ann Arbor, MI.
- Perform microfabrication tasks related to building an implantable retinal prosthesis including fabrication of polyimide-based microelectrode arrays, production of photolithographic mask plates, and deposition of iridium electrode metal.
 - Developing a packaging and feedthrough scheme for the retinal implant project. This includes an extensive literature survey and a database development of relevant coating, packaging and feedthrough technologies. Design and fabrication of vehicles to test candidate packaging technologies.

- Research Assistant:** September 1992 to December 2001, University of Michigan, *Center for Wireless Integrated MicroSystems*, Department of Electrical Engineering and Computer Science, Ann Arbor, MI.

Designed, simulated, fabricated and tested two- and three-dimensional arrays of penetrating microelectrodes (probes) for neural stimulation and recording.

- Bulk-micromachined CMOS technology: integration of CMOS with bulk micro-machining to produce microelectrode structures with on-chip signal processing circuits: SUPREM for process simulation.
- Developed a simple new technique of corner compensation/protection for protecting CMOS circuitry from undercut during the bulk micro-machined device release etch.
- Designed and conducted *in-vitro* and *in-vivo* experiments for verification of proper and reliable probe function under normal operating conditions.

Memberships/Awards/Honors

- VA Career Development Award, 2007-2010.
Member, The Association for Research in Vision and Ophthalmology, 2003-present.
Member, Eta Kappa Nu, Electrical Engineering Honor Society.
Member, Tau Beta Pi, Engineering Honor Society.

Leadership/Activities

- Cornell Nanoscale Science and Technology Facility User Committee, 2011-present
Board of Trustees, Cornerstone Bible Fellowship, 2011-present
Secretary/Treasurer, Cornerstone Bible Fellowship, 2007- present

Publications/Presentations
